The report also warned that "tax cuts could undermine economic growth and job creation in the short term by increasing the likelihood of an unemployment cycle which might delay or otherwise impinge on economic recovery.".. The report came just days before the Congressional Budget Office released a revised economic report and projections for tax cuts for everyone who pays income and payroll taxes. The nonpartisan, independent group said that "the CBO now views lower tax rates for individuals as likely" in the coming years/1080p.. The committee's chief economist, Esther George, argued that a temporary slowdown in the U.S. economy, including in manufacturing, may be just what Congress needs. "It remains a possibility that further fiscal changes, such as the one contemplated in the forthcoming tax reform proposal, could affect the underlying fiscal policies and the unemployment rate, since the U.S. labor market is likely to remain weak for some time to come," she wrote.
